

LATIN CRYPT

BOGOTÁ 2021

7th International Conference on Cryptology and Information Security in Latin America.

6- 8 October, 2021

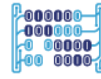

Bogotá Colombia – Virtual Conference

<https://www.urosario.edu.co/Latin-Crypt/inicio/>

Latincrypt 2021 is the Seventh International Conference on Cryptology and Information Security in Latin America, and is organized by the **Universidad del Rosario** in Bogotá, Colombia. We accept submission for original papers on all technical aspects of cryptology. The conference seeks original contributions on new cryptographic primitive proposals, cryptanalysis, security models, formal methods in cryptography, hardware and software implementation aspects, cryptographic protocols and applications, as well as submissions about cryptographic aspects of network security, complexity theory, information theory, coding theory, number theory, and quantum computing.

Date and venue

Due to the COVID-19 pandemic, Latincrypt 2021 will be held virtually, but we will have two fantastic virtual experiences to know more about Colombia. The first activity is a virtual tour to a traditional Colombian Coffee farm. In this tour you will explore, step by step, the complete coffee process from the planting of the seeds, up to the final product you got on your table. The second activity is a visual and auditory experience, where you will get to enjoy how will be the awakening in the coffee region, surrounded by beautiful landscapes and the songs of more than 92 birds species indigenous to the Colombian Coffee region.

Event coordination

Latincrypt general chair are Valérie Gauthier from Universidad del Rosario, Colombia. The program chairs are Carla Ràfols from Universitat Pompeu Fabra, Spain and Patrick Longa, Microsoft Research, USA.

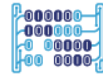

Invitation

The Latincrypt 2021 organizing committee is delighted to invite sponsors to partner with us in the event. Given the importance, quality and tradition of Latincrypt, we believe it will attract an interested and well versed public in cybersecurity and cryptography, both from academia and industry, as well as government. This represents an excellent opportunity to expose your brand name to a highly selective technical audience, as well influential decision-makers.

Benefits

Here is a non-exhaustive description of possibilities that will be available to your organization to expose your brand. As usual, the amount or form of exposition will depend on the level of sponsorship.

- Company logo highlighted in the event's main webpage.
- Company logo included in all forms of electronic/printed advertisement for the conference.
- Company logo displayed on the event's program and the virtual frame of the conference room.
- Company logo in the “Café de Colombia” virtual space.
- We will reserve a space to display your company banners.
- Free registration to all of the conference events included in the registration fee.

Categories for sponsorship (values in US\$)

Opportunities/ Categories	Diamond	Gold	Silver
Logo on the webpage	x	x	x
Logo in emails and other communication	x	x	x
Logo in the virtual frame of the conference	x	x	
Logo in the “Café de Colombia “ virtual room	x		
Space to display de company banners	x		
Free registration	5	3	2
Sponsorship quota (in USD)	5000	3500	2000

Observations:

- Changes in the benefits, prices and quantities displayed in this table are negotiable.
- Inclusion of brand materials (logos, etc.), can only be guaranteed if sponsorship offer is approved before materials are produced, around 60 days before the event starts.
